10 Day Panama Canal Cruise
Aboard Holland America’s Zuiderdam
February 14-24, 2014
Day | Port
--- | ---
Friday, Feb 14 | Fort Lauderdale
Saturday, Feb 15 | Half Moon Cay
Sunday, Feb 16 | At Sea
Monday, Feb 17 | Aruba
Tuesday, Feb 18 | Curacao
Wednesday, Feb 19 | At Sea
Thursday, Feb 20 | Enter Panama Canal
Thursday, Feb 20 | Cruising Panama Canal
Thursday, Feb 20 | Gatun Lake
Thursday, Feb 20 | Cruising Gatun Lake
Thursday, Feb 20 | Exit Panama Canal
Thursday, Feb 20 | Colon
Friday, Feb 21 | Limon
Saturday, Feb 22 | At Sea
Sunday, Feb 23 | At Sea
Monday, Feb 24 | Fort Lauderdale

Cruise Prices

Starting At:

- Interior, Category L: $1,839
- Oceanview, Category D: $2,159
- Verandah, Category VD: $2,339
- Superior Suite, Category SY: $2,739

Dr. Wafaa El-Badrawy, B.D.S., M.Sc
Dr. El-Badrawy is an Associate Professor of Restorative Dentistry at the Faculty of Dentistry, University of Toronto and maintains a private clinical practice in Mississauga, Ontario. She was the recipient of the American Academy of Esthetic Dentistry Research Award in 2003. In addition Dr. El-Badrawy has held numerous research grants from the Faculty of Dentistry Research Committee. She has lectured and presented research findings globally, has published more than a hundred research papers, literature reviews, book reviews and abstracts of research work, and is a member of many professional boards, associations, and organizations.

Dr. Omar El-Mowafy, BDS, PhD, FADM
Dr. El-Mowafy is a Professor and the Head of the Discipline of Restorative Dentistry at the Faculty of Dentistry, University of Toronto. He also has a private clinical practice in Mississauga, Ontario. Dr. El-Mowafy was the 1992 recipient of the Ralph Philips Memorial Award. He has lectured internationally, published over one hundred and eighty research papers, case reports, literature reviews, book reviews and abstracts of research work, and is a member of many professional boards, associations, and organizations.

1. An update on CAD-CAM technology and its current utilization: Currently the CAD-CAM technology is widely-used in the dental labs for various restorative applications. In addition, two rival chair-side units are available to dentists to enable them to provide instant crowns. Various CAD-CAM crowns will be discussed in detail with update on the latest porcelain materials used for their fabrication along with cementation techniques and clinical outcomes.

2. Improve your patients' smile with porcelain crowns and veneers: A good understanding and analysis of causes of patients' dissatisfaction with appearance of their front teeth is important for proper diagnosis and treatment planning. Careful and logical case analysis and review of the possible options will be discussed. A number of clinical cases in which the use of combinations of porcelain veneers and crowns was followed to enhance appearance of anterior teeth will be presented.

3. The latest on posterior composite restorations: Posterior composite restorations continue to be an area of extensive research and continuous development. Success in achieving superior posterior composite restorations that does not cause post-operative sensitivity remains an issue in clinical dentistry. The latest research in achieving proximal contacts in Class 2 composite restorations using different methods will be discussed. The effects of polymerization shrinkage and insertion technique on the production of adequate proximal contacts will be detailed.

4. Light-curing update - anterior composite restorations - management of root caries: Proper light-curing of composite restorations is key for their longevity. Results of several studies on light curing in dental offices will be presented. How to use anterior composite restorations in strategic manner to optimize esthetic outcomes? The layering technique: pros and cons. How to ensure long-term retention of anterior composite restorations?

Predictions indicate that root caries is going to be a significant patient management issue of the future. Increased life expectancy, better health, enhanced oral hygiene are factors that led to increasing number of geriatric patients with retained dentition. Root caries prevalence, incidence, diagnosis and treatment will be discussed.

Cancellation Policy:
Tuition is completely refundable if a course is canceled by the Office of Continuing Education or if the registrant cancels more than 21 working days prior to the course. Registrants who cancel 10-20 days prior to a course may apply the entire fee to another course or receive a 50 percent refund. No refund will be given for cancellations made less than five working days prior to a course, but tuition can be applied towards a future course. A $75 administrative fee will be charged for participants who cancel 10 working days prior to the course or who fail to inform us they are unable to attend until after the program. "No shows" for a program will forfeit the full tuition. Written confirmation of cancellation must be mailed, faxed or emailed to receive appropriate refund and/or credit. The Office of Continuing Education cannot be held responsible for a non-refundable airline ticket in the event of course cancellation or the rescheduling of a course.
