Endless Opportunities
Memphis Daily News – Sept. 19
Evans, 27, is a second-year medical laboratory science student at the University of Tennessee Health Science Center. Evans, who is juggling school, work and family, lives in Cordova with her husband and 6-month-old son. It’s a big load to carry, but she’s getting some help through a grant from the UT Alliance of Women Philanthropists.

New York Transplant Campbell Takes Over Health Law Institute
Memphis Daily News – Sept. 19
The health care community is rich within Memphis, as is the legal community, and Campbell hopes to tap into both, creating an interdisciplinary program that calls upon resources within The University of Memphis and other regional institutions such as The University of Tennessee Health Science Center.
Supporters of fetal-pain abortion laws often cite the work of Dr. Kanwaljeet Anand, a professor of pediatrics, anesthesiology and neurobiology at the University of Tennessee’s Health Sciences Center. He believes it likely that fetuses can feel pain at 18 to 24 weeks, but added that the “issue of fetal pain does not have much relevance for abortion, since most abortions are performed before the fetus is capable of experiencing pain,” The Times reported.

The University of Tennessee Health Science Center has received more than $1.5 million in grants from the U.S. Department of Health and Human Services. The funding will be used for four research projects.

Dr. Willis C. Campbell founded his clinic in 1909 in what would become the heart of the city’s medical district. Much of that district now is populated by the University of Tennessee Health Science Center, where Campbell helped to organize the Department of Orthopaedic Surgery.

Bruce W. Steinhauer, professor of medicine-general internal medicine at the University of Tennessee Health Science Center, will be recognized as the Lifetime Achievement winner at Memphis Business Journal’s 15th annual Health Care Heroes awards.

The Nathan Bedford Forrest statue in Health Sciences Park was marked with red paint and an expletive sometime between Thursday night and early Friday morning.

Key to luring organizations to the Downtown medical center is The University of Tennessee Health Science Center and the large research enterprise tied to the school, said Steven Bares, president and executive director of the Memphis Bioworks Foundation.
