RESIDENT CALL SCHEDULE

The weekend call will be every third weekend. The “call team” will consist of 4 residents. A URO-4, 3, 2 and 1 will comprise the “call team”. This group of 4 residents (1 from each level) will cover all involved hospital call and answering service calls. The URO-4 will function as the team leader and will be the one responsible for notifying the adult urology faculty or the pediatric urology faculty member on call with the resident team. The URO-4 resident at the Methodist University/MED rotation will be responsible for assigning the call schedule in 4-month blocks (specifically who is on call each weekend). This schedule is to be given to the appropriate staff as well as the education office. Weeknight call will be handled as before with the senior resident on each rotation determining the schedule.

After weekend call ends, all private patient contact should be typed and e-mailed to Trish Phelan the Monday after call. Also, a message should be left on the respective secretary’s voice mail of the phone contact for that physician. Every patient should be discussed with the attending (faculty) on call with the resident team. It is at the discretion of the senior resident (URO-4) as to the timing of notifying the faculty (i.e. emergent, urgent or routine call).
