The
University
of
Tennessee
Medical Units
MEMPHIS
The College of Medicine, since its establishment in Memphis in 1911, has grown into one of the largest medical educational institutions in the nation, and has become an integral and functioning part of one of the largest medical centers in the south. In the academic year 1958-1959, it officially ranked fourth in the nation in total enrollment, and second in the number of students graduated. In that same year, 72% of the students entering the College of Medicine were residents of the State of Tennessee. From its humble beginning in two-story Lindsley Hall, the College has expanded magnificently into a physical plant worth several million dollars, and, in addition, has long-term agreements with most of the medical units in the medical center, all of which points to the abundance of invaluable clinical experience for the student. Among the institutions operated directly by or in close affiliation with the College of Medicine are: John Gaston Hospital, Gallier Memorial Hospital, Tobey Memorial Children's Hospital, West Tennessee Tuberculosis Hospital, Kennedy Veterans Administration Hospital, LeBon- heur Children's Hospital, Memphis Speech & Hearing Center, West Tennessee Cancer Clinic, and Las Perlas Center for Neuromuscular Disease; and a welcome addition in 1964 will be the State of Tennessee Mental Health Hospital, presently under construction.
The University of Tennessee College of Dentistry is located in the heart of the Memphis Medical Center, one of the biggest and best medical centers in the world. The modern building with its adequate facilities enables the excellent staff to give the student a dental education of unexcelled caliber. Each department and each division has its own separate facilities for more efficient instruction of the student in his own particular phase of dentistry. Each department, Oral Diagnosis, Oral Surgery, Periodontics, Operative, Pedodontics, Crown and Bridge Prosthesis, Full Denture Prosthesis, and Orthodontics contributes to the student's appreciation of the patient as a whole.

The latest in materials and equipment is available to the student so that he may learn modern, practical dentistry and, thus, be better qualified to correctly and efficiently treat the ever-growing number of prospective patients.

The closeness of the college, both in proximity and cooperation, to the College of Medicine and Pharmacy, the School of Nursing, the numerous hospitals and other facilities such as the West Tennessee Cancer Clinic, Institute of Pathology, and Cancer Research Lab make the University of Tennessee College of Dentistry an ideal school for training in the profession of dentistry.

Individual instruction makes full-denture prosthesis a pleasure.
The College of Pharmacy has been in the midst of radical changes during the 59-60 school year. New courses have been added, rearranged or improved and several new faculty members have joined or will be joining the staff this year. Already Dr. Joe Haberle has joined the Department of Pharmacy Formulation and Manufacturing. In addition Drs. Lassle, Oulians, Taylor and Mr. Joe Mackey will be on the active staff starting in the Fall 1960.

The College of Pharmacy is accredited by the American Council on Pharmaceutical Education and is a member of the American Association of Colleges of Pharmacy. Membership in the association is limited to schools which maintain the high standards of instruction accepted by the association.

The College of Pharmacy offers one of the most extensive and well-rounded programs in pharmaceutical education in the entire South. Students gain valuable experience by actual compounding of prescriptions as well as studying the laws and why of the pharmaceutical world.

This year has also seen the start of a school publication, "The Triturations," which promises to bring the pharmacy student body up to date on happenings in and around the University of Tennessee. The school also can be proud of 100% membership of all students in Student Branch of the American Pharmaceutical Association.
School of Nursing

Since the first students graduated from the Memphis City Hospital Training School for Nurses, the forerunner of the present program, the University of Tennessee School of Nursing has developed into a truly collegiate school. Learning from the clinical areas, in conjunction with knowledge gained from science and liberal arts courses, prepares graduates of the program to function as professional personnel in beginning positions of nursing.

In 1957 the contract between the University and the City of Memphis Hospitals was amended with the result that student nurses are required to pay for their own maintenance and are released from all nursing service obligations. In addition the faculty is now responsible for student experience in the clinical areas.

The sound program now in existence reflects continued efforts of the faculty. Each department in the school is directed by a professor with a master's degree in that field. Each instructor holds at least a Bachelor of Science in Nursing.

The quality of the students and the program continues at a high level. Now students are ready to enroll in nursing programs on a graduate level. Current emphasis is on graduating a nurse who is fully qualified to perform staff nursing in any medical setting.
School of Biological Sciences

The School of Biological Sciences was organized in 1928 and consists of the Divisions of Anatomy, Chemistry, Pathology and Microbiology, Pharmacology, and Physiology. It is in these divisions that all students at the Medical Unit receive their basic science instruction.

In addition, each of the divisions offers training to graduate students who are expected to become candidates for the Master of Science or Doctor of Philosophy degrees.
The University of Tennessee Medical Units today offer good training in all the chief branches of the healing arts. The pictorial life of our students is pictured in this, the third edition of the ASKLEPIEION.

To those of you who are among the graduating classes, I offer my hearty congratulations for a hard job well done. To those of you who will be graduated in the near future I offer my best wishes for continued progress.

I commend and congratulate the editorial staff of the ASKLEPIEION for the way in which they have portrayed the University community and its activities. This book will be treasured increasingly by our graduates in the years ahead.

Divisions of Instruction
College of Medicine

Many hours are spent peeling over the intricate anatomical details of the brain.

The pediatric clinic confronts the student with a wide variety of pediatric problems.

In addition to his hospital and clinic training, the student is afforded a phase of medical training which is unique in medical education in the United States. This is the Family Care Program, pioneered at the University of Tennessee, and affording the experience in over-all patient management that is so vital in the practice of medicine. In this program, the student becomes the "Student Doctor" for an indigent family carefully screened and selected to provide a broad "family medicine" experience, and as such, assumes responsibility for every aspect of his family's medical care for a twelve-month period.

The College of Medicine operates largely on the learning-by-doing principle. Although the student's pre-clinical quarters are necessarily occupied by essential didactic lecture material and extensive laboratory training, he begins his contact with hospital patients early in his career, and his junior and senior years are composed mainly of diagnostic and laboratory studies and management and treatment of hospital and out-patient department patients. All of these clinical activities are supervised by the full-time university staff and volunteer members of the medical profession of the Mid-South.

It is generally agreed that a graduate of the University of Tennessee College of Dentistry is an operator of unexcelled ability and technique. The position of relative superiority which a graduate of the school assumes is a result of several different factors. The excellent staff of instructors is aided in its task of preparing the students for careers in dentistry by a progressive administration which has as its aim the graduation of men who have the ability to combine correct diagnosis with sound treatment.

The proper technique for research and the presentation of the results of that research is a basic part of the early dental education. Manual dexterity is refined by courses in dental anatomy, dental materials, and other courses in basic technical dentistry. The laboratory application of dental theories and techniques is continued throughout the second year of instruction. Oral pathology, periodontics, endodontics, and anesthesia are studied extensively during the second, third and fourth years. All students receive instruction in pedodontics and orthodontics, as well as surgery and anesthesiology, and graduate courses in these specialties are available. Also, the opportunity which the school offers to work with a student dental hygienist provides valuable experience. The well organized integration of the different phases of dentistry makes a graduate of the University of Tennessee College of Dentistry a man well qualified to assume his professional responsibility in the maintenance of the health of the general public.

"ONE MORE FOR THE ROAD"
The pharmacy student who emerges from the University of Tennessee College of Pharmacy is most qualified to begin work in any area of pharmacy. Students are trained in many fields and course-work is varied to fit the students' needs. The first year of professional training is more or less introductory including courses in official preparations, organic chemistry, quantitative chemistry, bacteriology, pharmacognosy and other courses. The second year finds the student beginning to actually fill prescriptions in periodic dispensing. Also background courses in biochemistry, physical pharmacy, medicinal products and physiology are offered to better acquaint the student with the working of the human body and the principles involved.

The senior year is spent almost entirely preparing the student to meet the public from fields of hospital pharmacy, retail pharmacy and some manufacturing and research. The addition of a modern dispensing laboratory enables the senior student to fill prescriptions encountering actual trade-name products. The Model Pharmacy includes some 18000 items of various companies. Phones have been installed to familiarize the student with procedures doctors use in phoning in prescriptions. As a step to better relations between the health professions, dental and medical students are invited to write prescriptions at least once a quarter for the pharmacy students to fill. The meetings and discussions which follow enable the students to understand the problems confronting the medical professionals.

DON'T DROP THE TROPHY!

BE CAREFUL OF THE WOLF (WHICH ONE?)

AND IN THIS CORNER
NATHANIEL THE TERRIBLE

TWELVE MIDNIGHT—ACTIVITIES ARE SLOWED
The first year of the current program is spent on a general college campus where students complete the necessary pre-nursing freshman courses. At the beginning of the sophomore year, students then enter the University of Tennessee at Memphis. At this time the study of nursing subjects is begun accompanied by courses in organic and biochemistry, anatomy and physiology, and microbiology. Each subject is supplemented by laboratory experience. Liberal arts courses at a local state university are carried in the junior and senior year.

The nursing portion of the curriculum begins with three quarters of Foundations of Nursing. Clinical experience during the study of medical-surgical nursing is gained by giving complete patient care in John Gaston Hospital and the outpatient clinics. In the junior year, students begin study of nursing specialties. One quarter each is spent in the study of maternity nursing and pediatric nursing. Psychiatric affiliation is gained through the facilities of Galtier Psychiatric Hospital while public health nursing consists of field practice in the Shelby County Health Department. Throughout the curriculum are planned field trips for additional learning. The final quarter is devoted to senior rotation nursing experience in the City of Memphis Hospitals with emphasis on ward learning.

STATE BOARDS?? YOU DON'T SAY

I'VE REGRESSED TO THE FETAL POSITION

NOW THIS LITTLE RED MARK...

THE KNEES BONE CONNECTED TO THE...

THIS HELPS US THINK BETTER

SUCH A FLATTERING POSITION
Since the organization of the School of Biological Sciences in 1926, graduate instruction leading to the Master of Science degree and the degree of Doctor of Philosophy has been offered at the University of Tennessee Medical Unit. Such work is presently offered in the Basic Medical Science Divisions of Anatomy, Chemistry, Pathology, and Microbiology, Pharmacology, and Physiology.

In January, 1960, graduate study was organized under an associate dean and a Graduate Medical Sciences Council. At this time Dr. Roland H. Alden was appointed to the position of Associate Dean of The Graduate School-Medical Sciences.

The faculty of the Graduate School consists of those members of the several faculties who are actively engaged in research and the instruction of candidates for the M.S. and Ph.D. degrees.
Alpha Kappa Kappa

The new house

First Row: Clyde V. Croswell, M.D., Hon. Grand Vice-President AKK International, District Deputy; Howard B. Hauen, M.D., Primarius; Charles E. Pack, M.D., Sponsor; Hershel P. Wall, President; William M. Hicks, Vice-President; John M. Oyer, Treasurer; Bennett L. Crowder, II, Recording Secretary.

Second Row: R. Newell Finchum, Corresponding Secretary; Joe B. Cooper, Historian; Thomas R. White, Marshall; Bruce E. Walker, Warden; M. A. Fry, Chaplain; John F. Albritton, Robert B. Avery.

Alpha Kappa Kappa had its beginning at Oxtuich Medial School in Hamburg, New Hampshire, on September 27, 1888, Chicago became a chapter of AKK on March 24, 1892, when U.T. was located in Nashville. In 1911 when U.T. moved to Memphis, the student chapter of Chicago and five chapters of Phi chapter united with the university, making AKK the oldest medical fraternity on the U.T. campus.

On October 5, 1952, the AKK's moved into their new chapter house at 747 Court Ave., after many years of planning on the part of officers and alumni. This is the first chapter of Alpha Kappa Kappa ever to build a new chapter house and for this we are truly grateful.

The past year was certainly a big one for AKK. One of the highlights was the 20th Annual Convention of AKK which was held in August, with Chicago Chapter acting as host. Featured speakers at the event were brothers William C. Andrews, M.D. (University of Kentucky) and James M. Hawkins, M.D. (University of Tennessee) named Tennessee's Doctor of the Year, and Honorary Grand Vice-President of AKK International Clyde V. Croswell, M.D., District Deputy of our own Chicago Chapter.

Although we can't be a bunch of bookworms, AKK has led the three major medical fraternities substantially for the past year. Our sports record affirms the fact that we aren't a bunch of jocks, either, but we are fast improving in this respect, especially after the completion of our basketball court.

Rounding out our activities were the numerous and varied parties held throughout the year. Each quarter's social functions were initiated by the pledge party. The junior's social was intranced by the annual Alumni Banquet and Dance which was held in the Spring.

We are especially proud of our alumni, fifty of whom serve on the faculty at U.T. They have worked hard and are continuing to work untiringly to make this the biggest year in the history of our chapter.

Encouraged by accomplishments in the past year, we approach the coming year with renewed enthusiasm.

Alpha Kappa Kappa

Members not pictured: James S. German, E. Earl Marvin, Danny J. Roback.
Delta Sigma Delta

Delta Sigma Delta Fraternity was founded at the University of Michigan on November 15, 1865. Its purpose was to create among men who were members during the first school year of the existence of Delta Sigma Delta and to conduct the charter members.

The present chapter at the University of Tennessee Kappa Kappa chapter of Delta Sigma Delta was organized on May 27, 1929. The seed from which this chapter grew was planted in Kappa Chapter at Vanderbilt University in Nashville, Kappa, which was founded in 1894, was the first chapter in the South. The founding of Kappa Chapter was inevitable since the Vanderbilt University College of Dentistry closure was followed by the opening of the College of Dentistry at the University of Tennessee at Memphis.

It is with great pride that we of Delta Sigma Delta look at the past record of this fraternity. Just as in 1933 we were able to present the group as can be seen by examination of the picture this year by one of the officers. In this picture we have seen a group of men who were members of the fraternity at a time when the members of the fraternity have been accomplished. These men are an excellent group for our present fraternity branch to be located at the University of Tennessee at Memphis.

Just as we were able to present the group as can be seen by examination of the picture this year. These men are an excellent group for our present fraternity branch to be located at the University of Tennessee at Memphis.

These men are an excellent group for our present fraternity branch to be located at the University of Tennessee at Memphis. The success of Delta Sigma Delta is indeed promising and we feel that bigger and better things are yet to come.

The first pharmacy fraternity of the professional fraternity, Kappa Psi, was founded at Russell Military Academy, New Haven, Connecticut, on May 30, 1879. Since that time Kappa Psi has steadily progressed to its present strength of eighty active collegiate chapters and twenty-one active graduate chapters with more than 50,000 members. Psi chapter was organized in Memphis in 1913. After a slow but steady increase in membership, Psi moved to its present location at 242 S. Pauline St., and since has become the largest pharmacy fraternity on the U.T. campus in Memphis. Also, Psi chapter takes pride in saying that it initiated more members than any other Kappa Psi chapter in the nation for the year 1969-70 except one other chapter. Kappa Psi takes pride in its longevity from which it is able to be proud throughout the years. Many of the active and alumni chapters and in the city of the many and famous Kappa Psi chapters. Psi is well known as campus leaders, holding down all the pharmacy class officer positions. Also, Kappa Psi ranks near the top in the intramural athletic standings throughout the campus. In addition our chapter is fortunate to have a collegiate member to represent us at the National Executive Council. This being Brother Weldon Pardie from Nashville, Tennessee.

The scholarship award for the College of Pharmacy is consistently presented to Kappa Psi for its scholarship accomplishments, a fact of which we are extremely proud. Kappa Psi is a member of the Professional Interfraternity Conference organized in 1958 to encourage high scholarship, professional research, advancement of professions, and the promotion of a spirit of comity among the professional fraternity in the advancement of professional ideals.

The Phi Chi Medical Fraternity was founded at the University of Vermont on March 31, 1881. It has grown to become the largest medical fraternity in the world with 38 chapters spread over the world. At present there are 42,000 members.

Alpha Beta chapter was located here in 1912, and was officially installed April 6, 1912, in 1930 the Alumni Association of Alpha Beta purchased our house which is located at 216 N. Waldran. We at Alpha Beta are the largest chapter of the largest medical fraternity in the world. At this time our membership is 50% of which about 60 live in the house.

Naturally officers for the coming year are: Bill Young, Presid. Sec. Bill Sims, investing junior Jer¥ Halladay, Secretary. Lee Browning, Treasurer; John Crabtree, House Manager. These men will continue to keep Phi Chi the highly efficient social organization it has been in the past. We have cut in the black for the past five years and at present have no outstanding debts.

Phi Chi is the social hub of the campus and is widely known for the number and excellence of its parties. We have a large balcony in the house which is used only for social purposes. We also have a smaller party room which is equipped with TV, a bar and music. We also have a large TV room with color television. We maintain an annual event each month, with the goal of being our Founder's Day Celebration. Our Fraternity Sweetheart is presented for this occasion. Our present sweetheart is Mrs. Bill Sims.

We have won the grand interfraternity trophy eight of the last ten years. Scholastics-all, we usually finish in the top three and have won the Scholastic trophy many times in the past. One of our members, George Taylor, is the new president of AOA, medical scholarship organization. Davis Post, another of our members, is writing president of the student body.

Phi Chi

The death of Madolette

What do men against the rule, you're $30 ahead in collateral
The Phi Delta Chi Fraternity was founded on November 2, 1893, at the University of Michigan. Eleven men were gathered here to effect an organization to advance the science of pharmacy and to foster and promote a fraternal spirit among its members. From this beginning, the Fraternity has grown to a present size of forty active chapters, serving the major colleges of pharmacy in the United States.

The Omicron Chapter, the twenty-fourth chapter of Phi Delta Chi, was founded in 1930 at the University of Tennessee at Memphis. Dr. R. L. Crowe, Dean of the School of Pharmacy at that time and later Grand President of Phi Delta Chi, was instrumental in founding the Chapter.

Omicron Chapter has shown its ability to lead in that Brother Frank Batten was elected as Vice-President of the Student Council. Other members of the Chapter also held offices in the Student Branch of the A.P.A. and Phi Chi, National Honorary Pharmaceutical Society. Our recently elected officers to guide the fraternity through the coming year are as fol- lows: Gerald Lusk, President; Pete Magoun, Vice-President; Kendall Lynch, Secretary; Presley Halsey, Treasurer; and Some DII and James Snyder as co-house managers.

Great leaders of all pharmaceutical endeavors since 1893 have been graduated in the valuable lessons of Phi Delta Chi Fraternity democracy. There has been found to be no substitute for this training. It is the "grass roots" of our fraternal accomplishments. Individual chapters and their adherence to great and dynamic fraternal principles for the promotion of the profession make us strong. Collective efforts of our forty chapters make us a great and forward force in the American Pharmacy of today.

Phi Rho Sigma is an international medical fraternity founded at Northwestern University in 1890. As a professional fraternity, it limits its membership to the field of medicine. It does not admit members of other medical fraternities (excepting honor societies) but may initiate members of the general social or literary fraternities. Phi Rho Sigma is a member of the Professional Interfraternity Conference and the Medical Interfraternity Conference. Phi Rho Sigma has chapters in approved medical schools in the United States and Canada, ranging from Nova Scotia to California. It maintains a permanent Central Office in Pittsburgh, Pa. Phi Rho Sigma has twenty-six undergraduate chapters and nineteen alumni chapters, having a membership of approximately 2,000 undergraduates and 20,000 alumni members.

Phi Rho Sigma fulfills its obligations as a medical fraternity by a program aimed at:
1. The professional advancement of its members.
2. Service to the medical schools.
3. Service to the medical profession.
4. Service to the community.

We, as U.T. are proud to be a part of such an organization, and we are grateful to the many alumni and friends who have assisted us in carrying out many of our goals during the past year and preceding years.

Psi Gamma Chapter of Psi Omega Fraternity, located at 1224 Union Avenue, is the largest dental fraternity on the University of Tennessee Medical Unit's campus. Psi Gamma Chapter was founded in 1926 and at the present time boasts a membership of one hundred thirty-seven members. The scholarship award has been presented to Psi Omega for three out of the past four quarters, suggesting the high standard of academic achievement being stressed by the fraternity. Psi Omega’s rush parties, senior parties, and informal get-togethers in the Pina Room are always affairs to be remembered.

The basic aim of the fraternity is to promote the dental profession among the undergraduate members as well as the advancing of the field of dental education here at the University as well as nationally.

Xi Psi Phi Fraternity was founded at the University of Michigan in 1889, and now has a total membership of well over 20,000. At present there are thirty-three Active Chapters and forty-nine Alumni Chapters.

Alpha Omicron Chapter, located at 871 Union Avenue, was organized at the University of Tennessee College of Dentistry in 1921 and the Chapter was reactivated in 1947.

The Xi Psi Phi Fraternity is a brotherhood of men chosen from those who have decided upon a career in the profession of Dentistry. It was organized for the purpose of providing a better, more substantial foundation upon which to build a successful professional life; of creating a desire for a cleaner, healthier, and more wholesome atmosphere in which to live; of developing an appreciation of the qualities of friendship and hospitality; and of stimulating a desire to include these qualities in the character of its members.

Lambda Kappa Sigma, International Pharmaceutical Sorority, was founded at Massachusetts College of Pharmacy on October 14, 1913. Since then Lambda Kappa Sigma has continued to grow and is now the oldest and largest pharmaceutical sorority with 34 active chapters in the United States and Canada and 15 graduate chapters. Our basic sorority operation provides for the training of young women in the cultural, social, educational, and professional fields.

The "Mortar and Pestle Club" was formed at the University of Tennessee College of Pharmacy in January 1950. The ultimate goal of this organization was to become affiliated with the national sorority, Lambda Kappa Sigma. The hope became a reality when on May 18, 1951, the group was installed as Alpha Epsilon Chapter with eight charter members. Since that time membership has increased to forty-three with two honorary members.

Every year Lambda Kappa Sigma becomes more and more active on the UT campus. As we continue to grow, our primary purpose is uppermost in our minds, that of seeking to further the position of women in the profession of pharmacy.
Athletics

In the closest fraternity intramural race in years, decided by the last game in the last of nineteen events, Phi Rho Sigma’s finishing kick caught Phi Chi at the finish line to win the 1959-60 Grand Intramural Championship by fifteen points. Kappa Psi finished third.

Phi Rho Sigma won the volleyball, softball and bowling tournaments and finished first in the basketball league. Phi Chi won the swimming meet and the golf tournament. Eight fraternities placed first one or more times in the nineteen-event program.

The intramural managers named co-winners for both the K. R. Van Horn awards, Dillard Dysart and Jack Spears were chosen best athlete and Bob Burch and Ray Minich best sportmen for 1959.

The 1960 softball team was shown at the last pitch.
In addition to the fraternity athletic events, 280 men on twenty-five teams participated in the summer class softball program won by the Medical Class of December '59. Jim Wiley won the '59 "Open" golf tournament. Skippy Wills won the '59 "Open" tennis tournament, and Phil Robinson and Wills finished first in the doubles. The nurses won the '59 women's volleyball league and also finished first in the 40 women's softball league.

In women's basketball the nurses from U-T won the '40 Cotton States Invitational Nurses Tournament and were the 1959-60 Memphis Nurses Champions. The dental hygienists and pharmacy girls fielded teams in local Memphis leagues.

END SYSTEM REPRINTED ON APRIL 28.—Students will have the opportunity to ratify or reject the proposed constitution for an honor system for the University of Tennessee Medical Units as part of the general election on Thursday, April 28. Students by now have received a letter from the President of the Student Council concerning an honor system which has been endorsed by the Faculty of Biological Sciences and the Student Council. A three-fourths majority of students voting will be necessary to ratify the constitution. Copies of the proposed constitution are available in room 112 at the University Center.

STUDENT COUNCIL NOMINATIONS CLOSE MONDAY. ELECTION IN TWO WEEKS.—Nominations of the 1960-61 officers of the student body must be filed by 5:00 P.M. next Monday, April 18. Candidates are nominated by a petition of twenty-five students from the school in which they are enrolled. This petition shall be turned in at room 112, University Center. This year the President will be chosen from the College of Dentistry, the Vice-President from the College of Pharmacy, the Secretary from the School of Nursing, and the Treasurer from the College of Medicine. Candidates must not graduate before June 1961. The school general election will be held two weeks from today, Thursday, April 28.

MINUTES OF APRIL STUDENT COUNCIL MEETING.—Excerpts from the minutes of the April 7 meeting of the Student Council: (1) The President, Dr. W. W. Shirley, was introduced. (2) The new faculty advisor, Dr. Barton L. McRae, was introduced. (3) It was announced that the constitution changing the Student Club Council to Student Council has been approved by the Medical Units—presented in the absence of President Davis Port. (2) (3) The Constitution and the Student Council has been approved by the (3) The Constitution changing the Student Club Council to Student Council has been approved by the Faculty Council. (4) The election procedure for officers of the Student Body and for the honor system referendum was discussed. The election will be held on April 28, closing date for nominations is April 18. (5) Two candidates for president who have not yet turned in yearbook pictures were asked to do so by April 11. It was announced that copies of the yearbook may still be purchased for 4.10, a $1.20 increase in price. (6) The Committee on the Honor System made arrangements for the presentation of the yearbook in each school, to be done sometime before the April 28 referendum. (7) Discussion centered around the procedure for the taking of yearbook pictures, with some members of the order of the day and the sequence for taking the pictures agreed. (8) The question was raised as to whether the yearbook pictures would be taken in the M.O.S. distance calls, and the procedure to be followed was discussed. (9) The question was raised as to whether the yearbook pictures would be taken in the M.O.S. distance calls, and the procedure to be followed was discussed. (10) The question was raised as to whether the yearbook pictures would be taken in the M.O.S. distance calls, and the procedure to be followed was discussed. (11) The question was raised as to whether the yearbook pictures would be taken in the M.O.S. distance calls, and the procedure to be followed was discussed. (12) The question was raised as to whether the yearbook pictures would be taken in the M.O.S. distance calls, and the procedure to be followed was discussed.

HALL S. TACKETT, M.D.  
Secretary-Treasurer

Alpha Omega Alpha is a non-secretive college medical honor society membership to which is based entirely upon CLEARNESS of talent; qualifications being satisfactory. It was organized at the College of Medicine of the University of Illinois, Chicago, August 26, 1912, and it is the only order of its kind in medical schools on this continent. It is a definite task of this society to encourage personal honesty and the spirit of hard work.

The Tennessee chapter elects members early in the spring quarter and holds its initiation banquet in June of every year. An effort is made at that time to obtain a speaker to give a talk on some medical or medical topic which is of current interest.

Occasionally a deserving alumnus or alumnus is elected to membership. Recently Dean Marvin C. Callison was elected as the first Alumni Member. Efforts are being made to extend the activity and influence of AOA in the life of the medical school, particularly in the fields of scholarship and medical research.

Dean's Society

The Deans' Society was founded at the University of Tennessee on December 4, 1948. It is an honorary society for undergraduate students in the College of Dentistry. It was named by its founders to honor Dr. Richard Singleton, former Dean of the College of Dentistry and his wife, Dr. Margaret Singleton, former member of Oral Pathology. Its membership consists of outstanding Junior and Senior students who are selected by a combined Faculty-Student Honors Committee.

The purpose of the society is to propagate and perpetuate professional ideals and ethics; to exert its influence unflinchingly for the advancement of the dental profession in methods of teaching, practice and jurisprudence; to elevate and sustain the professional character and education of dentists; to promote among them mutual improvement and good will; and to disseminate knowledge of dentistry and dental discoveries.

Omicron Kappa Upsilon

Omicron Kappa Upsilon is a society of dentists whose members are elected in the assembly of the society at its annual meeting. To encourage and elevate a spirit of excellence, the society is dedicated to dentistry and to the profession of dentistry.

The society was organized in 1946 at Northeastern University Dental School. This society's name is derived from the Greek letters, which indicate the name of this society. The society is known as Alpha Nu Chapter of Rho Chi, national honor society, and it seeks to encourage the highest standards of scholarship and character in dentistry.

The society seeks to encourage and elevate a spirit of excellence in dentistry and to the profession of dentistry. It aims to promote the highest standards of scholarship and character in dentistry.
The Student Council is composed of the presidents of each quarter's class in Medicine, Dentistry, Pharmacy, Nursing, Dental Hygiene, and Medical Technology and delegates from other representative organizations on the campus.

The purpose of the Student Council is to promote the activities of the student life in the University, to serve as a center for such activities, and to promote the best interests of the student. The Council spends much of its time in dealing with various problems the students may have.

The University of Tennessee Chapter of the Student American Dental Association was organized in November, 1955, at the request of the Tennessee State Dental Association and the American Dental Association. Since that time it has made great strides in becoming one of the largest chapters in the country.

The organization is governed by a board of directors consisting of twelve men, each elected by his class, and four officers elected by the entire membership of the chapter.

The purpose of the Student A.D.A. is to broaden the education and knowledge of the student by furnishing monthly to each member the Journal of the American Dental Association, and by bringing nationally recognized researchers and specialists in the dental field to the University for clinical lectures. The Student A.D.A. also acts as a medium by which the student is able to establish a contact with the organized program of the profession during the period he is receiving his education.
The Student Branch of the American Pharmaceutical Association was established in 1948 at the University of Tennessee School of Pharmacy. Its objective is to broaden the education and knowledge of the student by furnishing monthly to each member the Journal of the American Pharmaceutical Association and by bringing well-known speakers in the field of Pharmacy to the University for lectures. It also functions as a medium whereby the student is able to establish contact with the organized program of the profession during the period he is receiving his education.
The Tennessee Student Chapter of the American Dental Hygienists' Association, an organization composed of the dental hygiene students of the University of Tennessee, has as its purpose the fulfillment of three objectives. Participation in the organization helps to orient the student in her chosen profession; increases her interest in and knowledge of organized dental hygiene; and acquaints her with the importance of active membership in the American Dental Hygienists' Association after graduation. All members, honorary and active, work together in the interest of dental hygiene with the promotion of progress and higher ideals in their profession resulting from their efforts. Through its members and its organization, dental hygiene has become a greatly respected profession.
In 1939 a group of young women, sharing the common bind of being medical students' wives, formed a small social club at the University of Tennessee—the original Junior Medical Auxiliary. A year later it became active as its founders left Memphis for internships or distant cities.

Yet the seed for a social club for wives of medical students remained strong, and in 1943, the organization was again formed. An active membership of 32. They elected officers to direct their group, formed a working committee and adopted a Constitution for the Auxiliary, it read, "to promote friendship and better fellowship among its wives . . . ."

As the organization grew, so did its aims and projects. To keep pace with the expansion of the Auxiliary were recruited in 1950. The Auxiliary's objectives are described in its constitution: "To encourage friendship and good fellowship among its members; to provide for the future, both professionally and to serve the community and the medical school."

The Auxiliary now is its business. The Constitution and By-Laws were revised in 1956 and its active membership totals nearly 100. The Auxiliary's regular activities include welfare work with the children's ward of the college teaching hospital and a University-wide Blood-Donation drive for the weeks of blood banks. Once each quarter the members enjoy a luncheon and the Executive Board serves as hostess at an Alumni Tea. Perhaps JMA's greatest service was the establishing of a loan fund for medical students in January 1956. At this time we gave $2,000 to the University Loan Fund. February 1957 brought a donation of $1,000 from the Auxiliary. March 1959 saw it installed as a Chapter to the Woman's Medical Auxiliary of the American Medical Association, and we will continue until the end of the world. The Memphis Chapter, Student American Medical Association, formed the Junior Medical Auxiliary, a vital organization fulfilling the needs of its members for companionship, entertainment and personal activity.

The Junior Dental Auxiliary is composed of Dental Student's wives. The purpose of the Junior Dental Auxiliary is to promote friendship and good will among its members and serve as a medium for broadcasting their interest.

The project for the Auxiliary is to supply the Porter Leath Orphanage with toothpaste and to provide transportation for the children to and from their dental appointments. We had an additional project this year in that we supplied the children at the Memphis Neighborhood House with toothbrushes.

At the beginning of each quarter, we welcome the wives of the first quarter students to Auxiliary by having a reception in their honor.

At the end of each quarter, a luncheon is given to honor the wives of our graduating section, at which time an Honorary Diploma is awarded to each wife.

As the organization grew, so did its aims and projects. To keep pace with the expansion of the Auxiliary were recruited in 1950. The Auxiliary's objectives are described in its constitution: "To encourage friendship and good fellowship among its members; to provide for the future, both professionally and to serve the community and the medical school."

The Auxiliary now is its business. The Constitution and By-Laws were revised in 1956 and its active membership totals nearly 100. The Auxiliary's regular activities include welfare work with the children's ward of the college teaching hospital and a University-wide Blood-Donation drive for the weeks of blood banks. Once each quarter the members enjoy a luncheon and the Executive Board serves as hostess at an Alumni Tea. Perhaps JMA's greatest service was the establishing of a loan fund for medical students in January 1956. At this time we gave $2,000 to the University Loan Fund. February 1957 brought a donation of $1,000 from the Auxiliary. March 1959 saw it installed as a Chapter to the Woman's Medical Auxiliary of the American Medical Association, and we will continue until the end of the world. The Memphis Chapter, Student American Medical Association, formed the Junior Medical Auxiliary, a vital organization fulfilling the needs of its members for companionship, entertainment and personal activity.

The Junior Dental Auxiliary is composed of Dental Student's wives. The purpose of the Junior Dental Auxiliary is to promote friendship and good will among its members and serve as a medium for broadcasting their interest.

The project for the Auxiliary is to supply the Porter Leath Orphanage with toothpaste and to provide transportation for the children to and from their dental appointments. We had an additional project this year in that we supplied the children at the Memphis Neighborhood House with toothbrushes.

At the beginning of each quarter, we welcome the wives of the first quarter students to Auxiliary by having a reception in their honor.

At the end of each quarter, a luncheon is given to honor the wives of our graduating section, at which time an Honorary Diploma is awarded to each wife.

OFFICERS

MRS. THOMAS A. ROACH President
MRS. ROBERT BURCH Vice-President
MRS. STANLEY WILLIAMS Secretary
MRS. HARRY E. WICKES JR. Treasurer
MRS. JACKSON TISON Program Chairman
MRS. LOUIS B. GILHAM Social Secretary

The Nux Club, honorary society of the University of Tennessee Medical Units is composed of Seniors who are representatives of the fraternities recognized by the Committee on Student Welfare. The Nux Club was organized in October, 1979, for the purpose of the following: (1) Advancing the spirit of good will and fellowship among and between the various fraternities of the University; (2) Promoting favorable publicity for the Memphis unit of the University.

The Junior Pharmacy Auxiliary was organized in the year 1951 as a means to promote friendship and fellowship among the wives of the Pharmacy students of the University of Tennessee.

The members share beautiful memories as they look back over the past years at the senior dinners, parties, and picnics, but the most satisfying memories are of the useful projects carried on during the year. The present projects of the auxiliary are donating food, clothing, and money to a needy family at Christmas and sponsoring two lovely teenage girls from the Episcopal girls home.
Christianity involves commitment which is both unique and distinctive. The Baptist Student Center is a medium through which an adherence to the Christian faith may continue "to increase in wisdom and stature and in favor with God and man." The activities, without exception, are planned with a singleness of purpose—that being that our wills will be synchronized with His will. The student director is Rev. Russell E. Bridges.

Students, personnel and faculty of the University use the facilities the following hours:
- Monday-Friday 9 A.M.-10 P.M.
- Saturday 9 A.M.-11 P.M.
- Sunday 2-5 P.M. and 9-11 P.M.

The Wesley Foundation is the campus ministry of The Methodist Church. The place and function of the Foundation here at the University-Medical Center is to bring meaning and reality to the very real connection between Christian faith and the healing arts. This attempt is being made through a theological dialogue, a critical examination of the Scriptures, expressions of the faith through the arts, a review of the life and mission of the Church in our time, and an understanding of the self in the light of revelation and reason.

The Wesley Foundation office is in the Campus Religious Life Office on the third floor of the University Center, and is open Monday through Friday 9 to 5. The Rev. Beverly L. Poole is the director. The Foundation owns two lots on Court Avenue on which a student center will be built.

There are two regular weekly events: Wednesday Evening Mid-Week Break and Sunday Evening Forum.
The staff of the ASKLEPIEION is composed of students representing the Colleges of Medicine, Dentistry, Pharmacy, and the School of Nursing. Over a period of nine months, these students, with the assistance of Jim Stockdale, compiled the pictures and other materials from which the ASKLEPIEION emerges.

By glancing through the pages of this book, one can readily see that students at the Medical Units find that there are days of fun and gaiety as well as those of difficult study and long hours.

We of the staff hope that the 1960 ASKLEPIEION has captured on page some glimpses of everyday occurrences at the University of Tennessee and has depicted them correctly.
