RESEARCH EXPERIENCE

2017 – Present **Research Coordinator II, COCTP, UTHSC, Memphis, TN**

- Study design, implementation, and analysis of research projects focused on clinical outcomes in chronic kidney disease (CKD) and/or end stage renal disease (ESRD) using multiple data sources (VA-EMR, VA-Medicare)
- Manage regulatory and administrative duties for R01 and university grants in CKD/ESRD research area.
- Assist and provide work directions for fellows, residents in nephrology and graduate students.

2015 – 2017 **Research Data Analyst II, COCTP, UTHSC, Memphis, TN**

- Responsible for grant proposal preparation and manuscript preparations.
- Manage regulatory and administrative duties for R01 and university grants in CKD/ESRD research area.

2013 – 2015 **Research Data Analyst I, CANDLE Study, UTHSC, Memphis, TN**

- Led data analysis for healthcare outcome projects. Specialized in analysis, interpretation and communication of complex results. Examined the association between dietary intake and child cognitive development using statistical tools for a grant proposal. Also, investigated the association between Vitamin D levels and respiratory outcomes.
- Collaborated across a cross functional team to investigate the biological, social, psychological, and environmental factors contributing to early childhood development.
- Proactively identified opportunities and streamlined data analysis including automation of data loading from excel to SAS and implementing a SAS macro for imputation of missing data.

2011 – 2013 **Graduate Research Assistant. UAMS, Little Rock, AR**

- Conceptualized the idea for my master's thesis titled "Association of Urinary Incontinence and its treatment patterns with comorbid conditions" developed hypothesis and proved it with statistical analysis. Results of the study have shown an association between urinary incontinence and comorbid conditions, which subsequently have an effect on treatment patterns of urinary incontinence. A part of the thesis work was presented as couple of posters at ISPOR (June 2014). Data source for the thesis project was IMS LifeLink data, SAS was used for analysis.
- Developed the hypothesis for another project about examining the prevalence and predictors of testosterone replacement therapy (TRT) and performed statistical analysis using SAS. Results of the study have shown an increase in TRT use in patients with certain diseases.
- Evaluated the effect of Urinary Incontinence on quality of life among Medicare beneficiaries using Medicare Health Outcomes Survey (MHOS) data and SAS. Results observed in this study are a decrease in physical and mental quality of life in patients with urinary incontinence.
- Designed a study to examine the national trends in usage of psychotropic medications in children with ADHD in US using Medical Expenditure Panel Survey (MEPS) data using SAS and STATA. Study results have shown an increased use in antipsychotics and decrease use of stimulants in recent years.
- Compared cost-effectiveness of three antimuscarinic drugs in treatment/management of overactive bladder. Aim of this project was to replicate a published economic model

using TreeAge software.

- Examined the off-label use and metabolic side effects of antipsychotics in Medicaid children. Developed a database in Access for this project from Medicaid antipsychotic consent forms. Submitted the report to Arkansas Medicaid.

2008– 2011 **Graduate Research Assistant.** UTHSC/SJCRH, Memphis, TN

- Developed a project and investigated the association of MRP4 (transporter) and B2AR (GPCR) through a novel PDZ protein MAGI3 using protein arrays. This association may be important for regulating cAMP levels in LNCaP cells and affecting the downstream expression of certain genes that depend on the cAMP signal transduction.

2004– 2006 **Graduate Research Assistant.** OUAT India.

- Developed a project and identified potential lead compounds from the NCI database using fingerprint based insilico screening. Identified 17 potential lead compounds from the NCI database using fingerprint based insilico screening.

TEACHING EXPERIENCE

2011 – 2013 **Graduate Teaching Assistant.** UAMS, Little Rock, AR

- Conducted team-based learning sessions in class, graded exams and evaluated projects and assignments of Pharm.D students.

NON-ACADEMIC EMPLOYMENT

2003-2004 **Marketing Executive,** Alembic Pharmaceuticals, India.

- Led the marketing efforts of cardiovascular and anti-diabetic drugs. Helped in increasing the drug sales by coordinating with a number of medical practitioners and pharmacists.

LIST OF TRAINEES
