Notes:																
1. Formerly Facility Number 0-791139. Changed by State of TN April 2000 to correct a bookkeeping error.																
2. Gallons-Capacity											KEY					
3. Regulated tank, State notification required.											I-Fuel Cleaning					
4. Equipped with automatic tank gauging system (ATG)											II-Tank Inspection					
5. Requires annual tank tightness testing.											III-Tank Tightness Testing					
6. Requires Cathodic Protection Testing on piping every three years.											IV-Tank ATG Preventive Maint.					
7. Cathodic protection on tank.											V-Test Cathodic Protection Syst.					
8. Equipped with PAL-AT line leak detector.
