Contact us for training and support for any of these academic technologies

Adobe Presenter

Adobe Presenter is a rich media and e-learning authoring tool that enables anyone to create professional, high-quality, on demand presentations within Microsoft PowerPoint.

Blackboard

Blackboard is our online learning management system. We are currently running version 9.1.

Camtasia Relay

Camtasia Relay is a screen recording application that makes it easy to capture audio, on-screen activity , and keyboard/mouse input.

CORE

The Curriculum Outcomes and Reporting Engine (CORE) is the curriculum mapping tool currently used by the College of Medicine. CORE is commercially known as LCMS+, a curriculum management system for healthcare eduction.

ExamSoft

ExamSoft is our official computerized testing software, used by a majority of our colleges to prepare, deliver, and analyze high-stakes exams.

Faculty Portfolio

Your Faculty Portfolio is a centralized, personal website for you to record your professional activities. You control the level of access to the information you place in your Faculty Portfolio.

Mathematica

Mathematica is the world's most powerful global computing environment. It makes possible a new level of automation in algorithmic computation, interactive manipulation, and dynamic presentation - as well as a whole new way of interacting with the world of data.

one45

one45 is a web-based health sciences curriculum information management system used to manage electronic portfolios, curriculum mapping and objectives, manage and search curriculum database, and more.

Parscore

ParScore is an electronic ScanTron scoring application that allows instructors to grade and record students paper-based exam results. This system takes the manual work out of scoring tests, transfers scores to an online grade book, and prepares reports.

ProctorU

ProctorU is a live online proctoring service for test takers taking exams online. The proctors use a three-step process to replicate the face-to-face proctoring experience. ProctorU service connects the test taker with a real person they can see and hear.

Qualtrics

Qualtrics is a web-based survey service that is available for use by all faculty, staff, and students. Qualtrics allows the user to easily create surveys, collect and store data, and produce reports.

Respondus Suite

The Respondus Campus Wide software allows faculty and staff to seamlessly transfer tests and quizzes between Blackboard and test editing software.
Respondus Lockdown Browser is a custom Internet browser utilized for Blackboard tests that locks down the testing environment, preventing students from printing, copying, going to another URL, or accessing other applications during the assessment.
Study Mate helps students master course material through learning activities, self-assessments, and games. A dozen activities, such as flash cards, crosswords and quizzes, engage students with course content in an individualized way.

Turning Technologies

The TurningPoint audience response software integrates 100% into PowerPoint and allows for powerful data collection and assessment tools that collect real-time audience responses to dramatically improve productivity and results in the classroom.

UTHSC TV

UTHSC TV is a streaming media service where users can upload and share video content.

Zoom

Zoom is a web-based conferencing site that allows for users to have high-quality interaction in real time for their computers or mobile devices. The recording feature allows for future reference or to be able to send it to those unable to access/attend the conference.
